Rasterlink Pro SSG requires that the head carriage be able to move back and forth only a few times every second. The default frequency is 12 Hz. Select "Low Rate" or "High Rate" in the carriage rate selection window. I was using Acroprint ver. Bit for pc printing. Now I have a new mimaki and I want to know how to get the rasterlink pro 5 to work like it used to. After installing Rasterlink Pro SSG I am trying to print a test page to the printer and it says the "Standard not supported." Has anyone been able to do that? Now I have a new mimaki and I want to know how to get the rasterlink pro 5 to work like it used to. After installing Rasterlink Pro SSG I am trying to print a test page to the printer and it says the "Standard not supported." Has anyone been able to do that? On the mimaki website: "3. If you are running Windows XP Service Pack 2 or later, please make sure you have the following optional hardware: ". It's not there on my version of Windows. Can anyone confirm or deny this? Are the printer. I have a new mimaki and I want to know how to get the rasterlink pro 5 to work like it used to. After installing Rasterlink Pro SSG I am trying to print a test page to the printer and it says the "Standard not supported." Has anyone been able to do that? I am running Windows Bit now and I updated my Rasterlink SSG to . I have a new mimaki and I want to know how to get the rasterlink pro 5 to work like it used to. After installing Rasterlink Pro SSG I am trying to print a test page to the printer and it says the "Standard not supported." Has anyone been able to do that? The print rate is 12. in this mode, and i can't figure out what it is for. Now I have a new mimaki and I want to know how to get the rasterlink pro 5 to work like it used to. After installing Rasterlink Pro SSG I am trying to print a test page to the printer and it says the "Standard not supported." Has anyone been able to do that? Now I have a new mimaki and I want to know how to get the rasterlink pro 5 to work like it used
